

Portfolio – Project Management

The Argus Team has an appreciation for cost effective solutions, and understands corporate inter-relationships. We have a proven track record in DOD, DOE, and commercial contract environments.

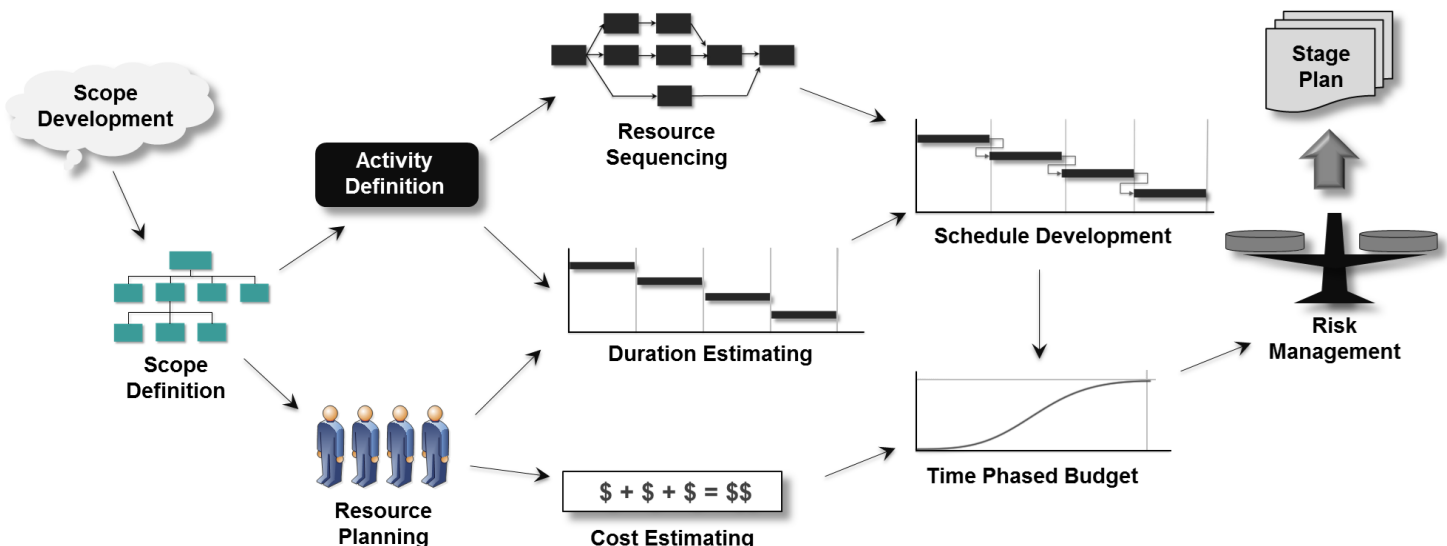

We understand timelines, phase gates, and the importance of every project stage within the portfolio being individually planned/managed/approved.

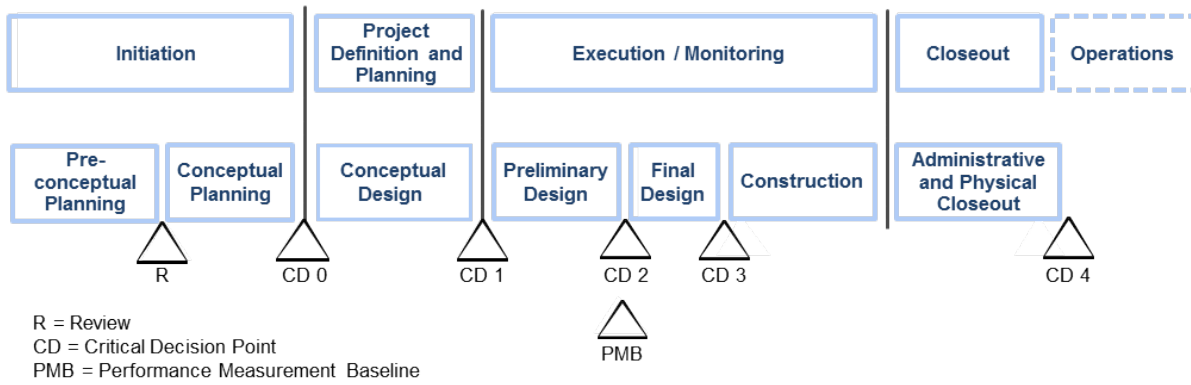

Our professional approach to supporting corporate growth strategies in the conduct of a “Gap Analysis” emphasizes change through evolution when practical.

We are experts in Project Management and control solutions, inclusive of full Earned Value Management (ANSI/EIA 748) implementation: system design and deployment; process, procedure development, and documentation; instructor-led and web-based training; system evaluation and surveillance.

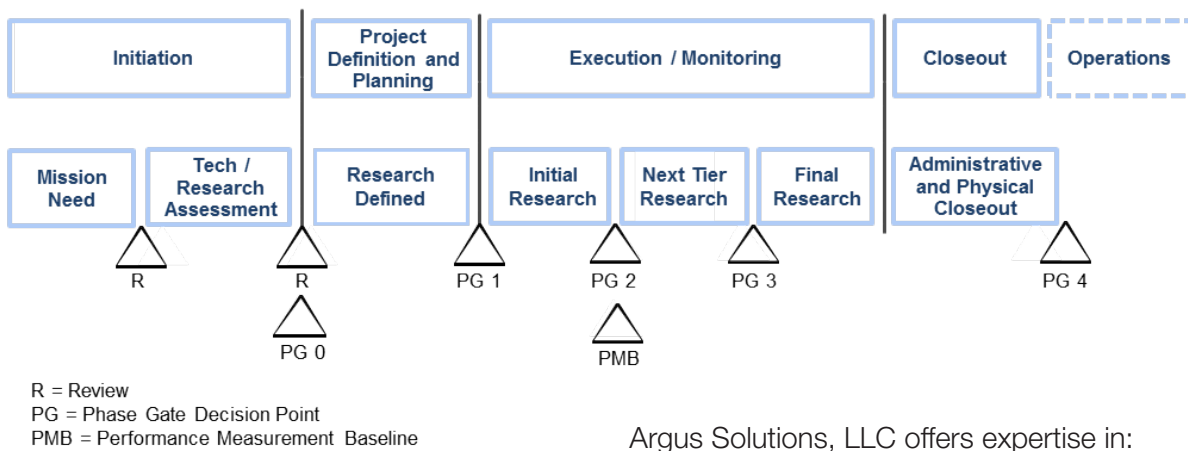

The Integrated Planning Process

Engineering, Procurement, and Construction Projects

Research & Development Projects
